Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I'm worried about my home every rainy season." • "We never get enough warning before floods." • "The authorities don't listen to our concerns."	THINKS • "Will my family be safe if the water rises again?" • "I wish there was a better way to prepare." • "Is anyone actually working on a solution?"
PERSONA NAME <i>Local Resident in Flood-Prone Area"</i>	
DOES • Installs makeshift barriers around the house • Checks weather updates frequently • Participates in community meetings	FEELS • Anxi • Frustrated by lack of reliable information • Overwhelmed by the scale of the problem
